
Best Java IDE for bot coding?

Posted by sanitybot - 2008/09/03 13:43

I'm looking to start coding a bot based on the OpenHoldem platform - what's the best IDE to use? I've done some Java coding before and used to use IntelliJ but I don;t really want to have to pay the license - is Eclipse any good?

I use IntelliJ Idea - Eclipse is pretty cool but it's just too bluky for me and I've used Idea for too long. It is pricey though, 200 euros for a developer licence :(
